

6 ACCESS MANAGEMENT PLAN

M-59 is the primary east-west state trunkline route connecting I-96 and the City of Howell. Traffic volumes will continue to increase as population and development grows in western Oakland County. MDOT identified the section of M-59 that traverses White Lake Township as a segment for which access management recommendations are necessary. Subsequently, a plan for the Highland Road (M-59) corridor was developed by the Michigan Department of Transportation and URS for the M-59 corridor. The plan was adopted by the Township, and is an element of this Master Plan. The document is entitled: *M-59 Access Management Plan - White Lake Township, Authorization 2003-0079 (27); CS 84917-JN73156, August 16, 2004.*
